### **DETAILED ACTION**

Claims 1-24 are pending in the application.

#### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-9, 15, 19, 20, 22 and 23, drawn to a conjugate comprising the homeodomain of antennapedia, and another domain that is not naturally associated with said homeodomain.

Group II, claim(s) 10-14, drawn to a nucleic acid encoding said conjugate.

Group III, claims 16 and 17, drawn to a pharmaceutical composition comprising said conjugate.

Group IV, claim 18, drawn to a method of preparing a medicament using said conjugate.

Group V, claim 24, drawn to a method for the treatment of a disease by administering said conjugate to a patient.

PCT Rule 13.2 requires that unity of invention exists only when the shared same or corresponding technical feature is a contribution over the prior art. The inventions listed as Groups I-V do not relate to a single general inventive concept because they lack the same of corresponding special technical feature. The "special technical feature" of Group I is a fusion protein comprising antennapedia homeodomain which is shown by Schutze-Redelmeier et al. (1996, The Journal of Immunology, Vol. 157: 650-655, see page 651, Figure 1) listed in the

Art Unit: 1636

international search report. Therefore, the invention lack novelty and does not make a contribution over the prior art.
